

# HybridAssist

Assisting the Hybrid Work Revolution to create a greener, happier, and more productive workforce!

Hybrid work arrangements offer employees the freedom and flexibility to determine when and where they work.

They can also build trust between employer and employees, broaden your talent pool, and help save on costs.

A hybrid working arrangement can also presents its challenges, however:

1. It can be difficult for employees to arrange a suitable day or time to work together in-person.
2. There is lack of visibility on how many are in the office each day, and if sufficient resources are available.

Our **HybridAssist App** gives your employees the ability to book their place in your office building or local hub, as well as booking an individual desk or collaborative zone.

Employees can search the location status of their co-workers to check if and when they will also be in the office or if they will be **WFH - Working From Home / Hub**.

Powered by  Microsoft Power Platform

## App Highlights:

Book your location and desk in the office or set your status as working from home / hub.

Workers can coordinate times to collaborate in-person together, maximising productivity, while retaining the benefits of flexibility.

Manage building occupancy levels to maintain social distancing and health guidelines, and / or reduce spend.

Reduce the carbon footprint of the workforce through encouraging WFH. Employees can measure carbon miles saved.

## Additional Benefits:

Data stored securely in Dataverse which is Microsoft Power Platform's cloud database.

All data is retained in your own tenant and access to the app is strictly for your employees, so the access is fully protected.

App can be deployed and run through a browser, Microsoft Teams or as a standalone app on your desktop or mobile.

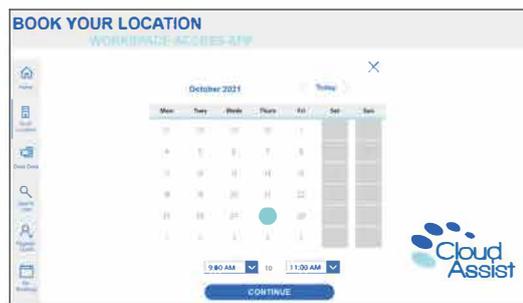

The carbon saving from working from home or local hub is calculated and collated for the whole organization including guests.

## How It Works:

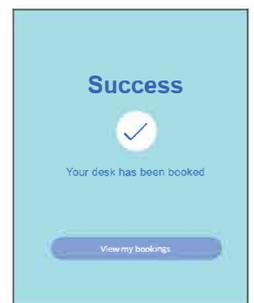

### 1. Select your access needs...

### 2. Choose your desk, date, time...

### 3. You're done! :)
